

Careers Education - Employers

Springwell Community College ensures that all students have encounters with employers each year, with the aim of giving them a better knowledge of the wide range of career paths available to them.

We aim for all students to have a minimum of one meaningful encounter with an employer during each year of their college life. Below are examples of the different ways that both local and national businesses engage with students at Springwell.

- Speakers in assemblies explaining their industry and specific career pathways.
- Student visits to employers.
- Virtual work experience.
- Student mentoring.
- Student mock interview day.
- Attending the annual careers fair.
- Running workshops for students with specific interest.
- Talks to vocational students providing information for use in assignments.

Springwell Community College would welcome any interest from employers who would like to support students in their career journey, be that in one of the ways outlined above or in another way.

If you wish to discuss getting involved and supporting the careers programme at Springwell please e-mail: careers@springwelcc.org to arrange a discussion on how you can help. We look forward to hearing from you.
